

SOS

Safely Opening Schools

End-to-End Services Timeline

Introduction Meeting with CDPH

CDPH will coordinate an initial meeting for schools and districts. The meeting will include representatives from CDPH, the vendor, and Safely Opening Schools (SOS).

Coordinate with SOS

Districts/schools meet with Safely Opening Schools to create an effective implementation testing strategy. SOS uses lessons learned from consulting with schools and districts across California.

Testing Logistics with Vendor

Districts/schools meet with the vendor and formalize testing logistics: frequency, location, and point-of-contacts, etc. The collaborators then agree upon a testing start date.

Testing Launch Day

Safely Opening Schools can be available during launch day to make sure testing is successful, and that district and vendor staff are collaborating effectively.

Testing Program Check-ins

Safely Opening Schools will monitor testing and collect input and feedback to further optimize the testing strategy between the vendor and school site.

Coordinating a Site Visit

Safely Opening Schools is available to conduct school site visits to optimize testing by providing in-person technical assistance and support. SOS offers an evaluation tool and can provide written feedback to the school/ district.
